About US

www.bdgroyalty.com

We are BDG Royalty and we know everything about building and growing successful online casino businesses. In 2007, we started as a small reseller and grew into a large and successful business with 500+ full-time employees, and a wide range of services for the iGaming market. We develop feature-rich Turnkey platforms, White Label platforms, Self-Service solutions and Bitcoin casino solutions. Our platform has an advanced loyalty system, together with gamification and tournaments features and unlimited customisation options for your choice. We provide the best gaming providers, including Evolution Gaming, Big Daddy colour prediction, BetSoft, QuickSpin, Microgaming, BetConstruct, NetEnt and much more via a single integration.

Our platform is able to handle millions of transactions per day without glitches and slowdowns. Our uptime metrics are one of the best in the industry and our support is working 24x7 to solve any issues you might encounter. We provide many things as a standard package, like a standard game catalogue with high-quality thumbnails, country restrictions, customizable limits, seamless wallet integration, and more. We issue updates to our platform weekly, so you can be sure that you have all the latest features and upgrades that you get as a part of your integration, with no hidden fees. Apart from that, you can get all other services related to building your own online gambling business, like gaming licensing, banking, company incorporation and hosting. Finally, you can get step-by-step recommendations on how to grow your casino into a profitable business, thanks to our Customer Success Department and strong promotion & SEO team. In one word, we have all you need to start and run your successful online casino business, and to join our family of 300+ satisfied clients worldwide.

BDG Royalty is an investment platform because it takes a different approach to football betting. Instead of trying to predict the exact outcome of a game, Lotus Gaming looks at the probability of different outcomes and then invests in the inverse score.
